DRAFT / NOT APPROVED. This is not an issued guide. It has open review items.

Overall classification of this document: UNCLASSIFIED — SYNTHETIC EXAMPLE

SYNTHETIC EXAMPLE — Security Classification Guide for the LANTERN Training Sensor (NOT REAL GUIDANCE)

Field	Value
Guide ID	urn:uuid:5e1d0c3a-0000-4000-8000-00000000a001
Revision	2026-r1
Payload digest	sha-256:0707eed223b4539cfd2605e58fac222ef3ea3d51969930497ac7d43f2af8cc42
Issuing organization	Example Agency (fictional)
Original classification authority	Casey Sample, Director, Example Programs (fictional)
Point of contact	Jordan Example, Security Program Manager (fictional)
Issued	2026-10-01
Next review due	2031-10-01

DRAFT / NOT APPROVED

Introduction

This synthetic guide shows each kind of OpenSCG entry: an unclassified element, classified elements, a level range with conditions, an exemption, and a compilation.

Open review items

- OSCG-V046 (policy_review) at /document_markings/review

(U) General program information

Portion	Information	Level	Reason	Declassify
(U)	The program name LANTERN and the fact that the program exists.	U	Not required (unclassified)	Not applicable
(U)	The identity of the sponsoring office.	U	Not required (unclassified)	Not applicable

(U) Performance

Portion	Information	Level	Reason	Declassify
(U)	The maximum detection range of the sensor, stated as a specific figure.	S	1.4(a), 1.4(e). Synthetic rationale: knowing the exact range would let an adversary plan to stay just outside it.	25 years from the date the record was created
(U)	The operating frequency band of the sensor.	U to C: Unclassified when stated only as a general band name. Confidential when stated to within 10 MHz.	1.4(e). Synthetic rationale: a precise band would make the sensor easier to jam.	On 2040-12-31
(U)	Specific conditions under which the sensor fails to detect a target. Controls: NOFORN	S	1.4(g). Synthetic rationale: describes a vulnerability of the system.	On event: Retirement of the last fielded LANTERN unit, as announced by the program office.
(U)	The sponsoring office together with the operating band, in the same document. *Compilation of gen-sponsor, perf-band when: Both items appear together in a way that associates the band with this sponsor.*	S	1.4(a). Synthetic rationale: together they reveal a mission focus that neither reveals alone.	10 years from the date the record was created
